BOOKCASE

DESIGN MARC SADLER

Libreria indoor-outdoor modulare e componibile in acciaio, realizzata con elementi ottenuti da taglio laser e piega. La libreria è composta da:

- base con piedini regolabili in massello di ottone tornito
- elemento angolare posizionato sempre alle due estremità, e anche al centro
- elemento con tre lati in due dimensioni da posizionare sempre al centro
- ripiano

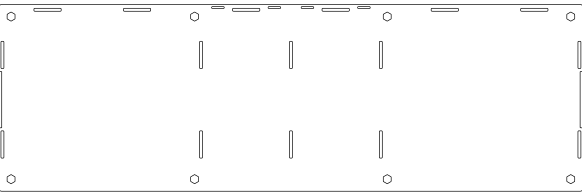

il gioco delle linee, dei vuoti e pieni, e' reso possibile dall'alternarsi dei due elementi centrali a tre lati e quello angolare a due lati. Gli elementi sono montati ad incastro, per composizioni in altezza viene fornito un fissaggio a parete ogni tre vani, che resta a scomparsa dietro lo schienale degli elementi divisori. Una cinghia di ancoraggio in nylon posta lateralmente chiude e ferma la composizione. Disponibile accessorio portapenne in acciaio e scatola in MDF rivestito in cuoio.

Indoor-outdoor modular and sectional bookcase in steel, realized with laser-cut and bent elements. The bookcase is composed of:

- *base with adjustable feet in solid brass turned on the lathe*
- *bilateral angle element to be placed always at the two extremities, and also in the middle*
- *trilateral element in two dimensions to be placed always in the middle*
- *shelf*

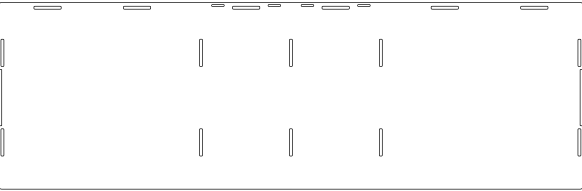

The play of lines and full and empty spaces is made possible by the alternating use of the trilateral elements in the two dimensions available and the bilateral angle element. The elements are assembled in an interlocking manner and a wall-fixing system, hidden from sight behind the back piece of the space dividers, is provided every three compartments for high compositions. A fastening belt in nylon positioned laterally closes and blocks the composition for major stability. Accessorized with steel pen holder and MDF box upholstered in hide leather.
